EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. The application has been amended as follows:

Drawings:

Sheets 1-3 of the drawings filed February 6, 2004 have been replaced with the drawings filed August 18, 2004 as requested.

End of Amendment.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: All the prior art references rely on imaging by radioactive markers or limit to fluorescent or organic dyes. The Mattrey patent (US 6,444,192) teaches using particulate contrasting agent and disfavors nanoscale particles. The Klaveness patent (US 6,159,445) teaches the use of nanoscale contrast agent, but there is no teaching of semiconductive material as the contrast agent. The Toida patent (US 6,636,755) teaches the use of near-infrared fluorophore. None of the prior art references of record teach or suggest a lymphatic imaging process by exciting the particle of semiconductor nanocrystal or quantum dot and detecting emission from the particle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to H. T. Le whose telephone number is 571-272-1511. The examiner can normally be reached on 10:00 a.m. to 6:30 p.m., Mondays to Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on 571-272-1284. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
